

luminAID™

THE WORLD'S FIRST INFLATABLE SOLAR LIGHT.

WHAT IS THE LUMINAID LIGHT ?

The LuminAID solar light is simple and easy to use. It provides 4-6 hours of light and fully charges in 5 hours.

① CHARGE

- Fully charges in 5 hrs of sunlight
- 4 hrs of light on HIGH setting
- 6 hrs of light on LOW setting
- Battery will last for 800 charge cycles
- Charge will hold for approx. 6 mos.

② INFLATE

Inflate the light to diffuse the super-bright LED light and create a waterproof lantern.

③ ILLUMINATE

Press button for OFF, HIGH, and LOW light settings

Other Product Features:

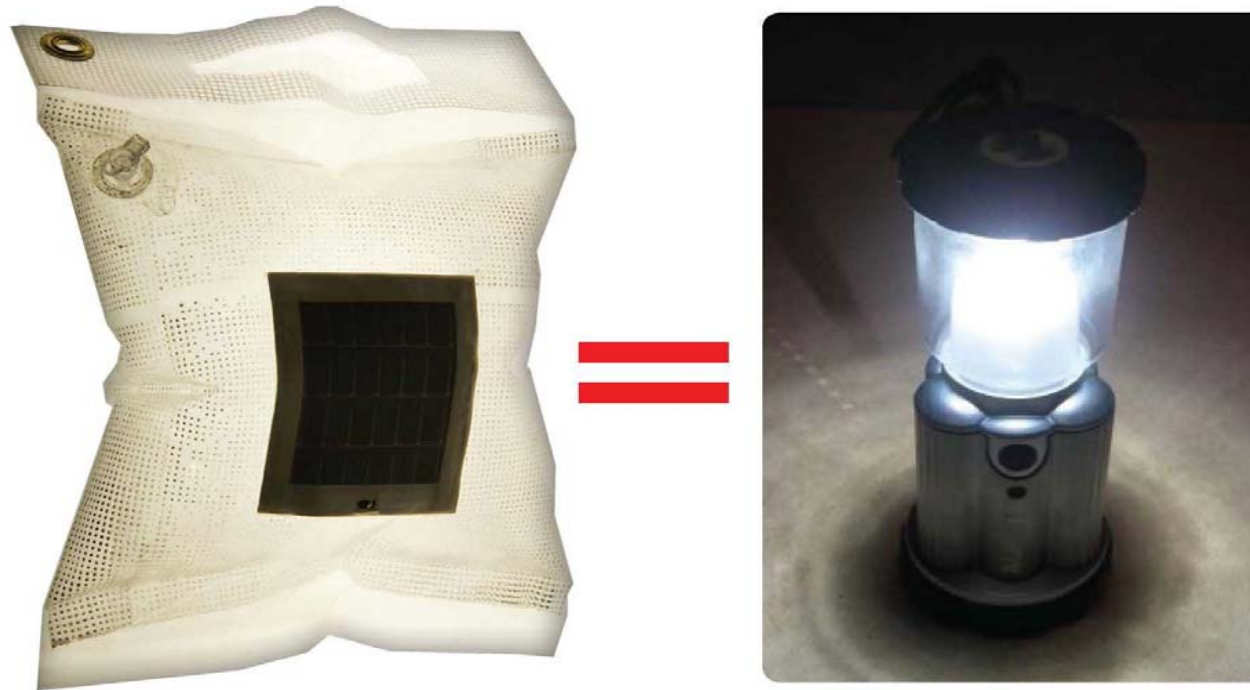

Your LuminAID light is lightweight and portable. Don't forget to take it with you everywhere you go!

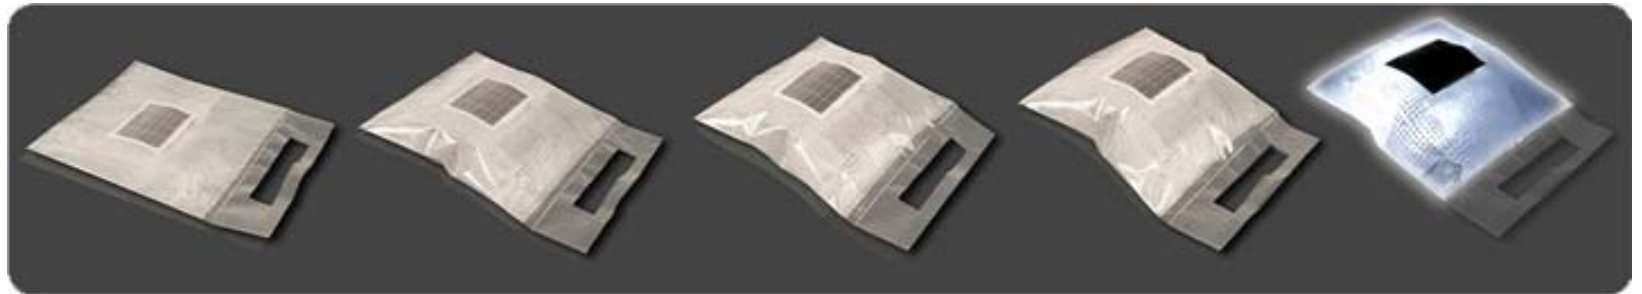

Your LuminAID light is waterproof and can float when inflated.

The LuminAID solar light inflates to diffuse light like a lantern.

The circuit and photovoltaic panels are sandwiched between the two layers of plastic, protecting it from damage and making the pillow waterproof. When inflated, the LuminAID solar light can float. The outside layer of plastic can be printed with additional logos or patterns.

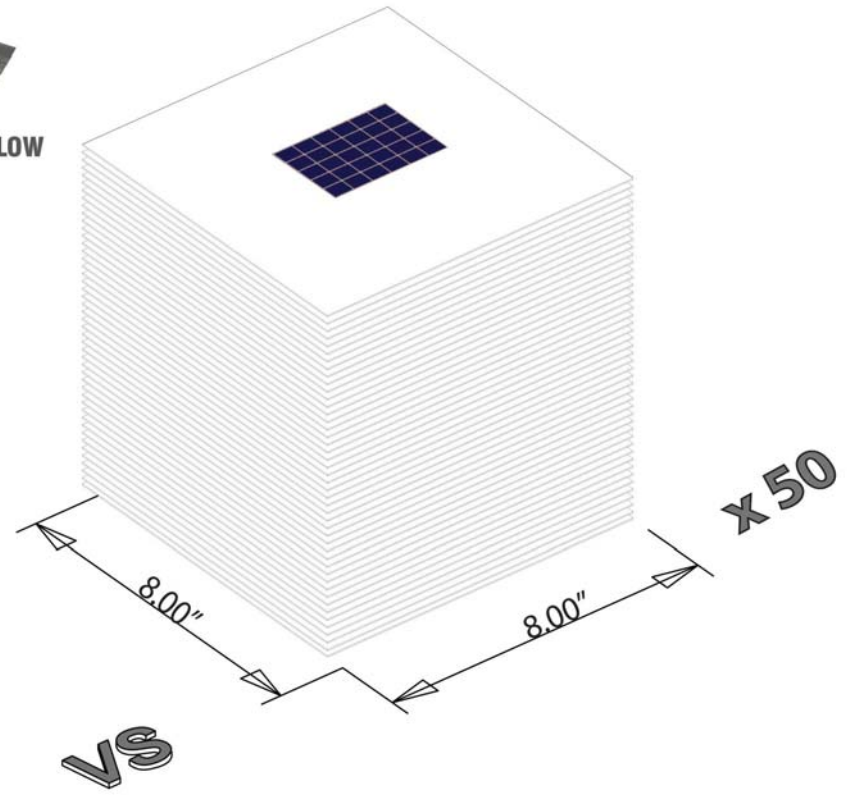

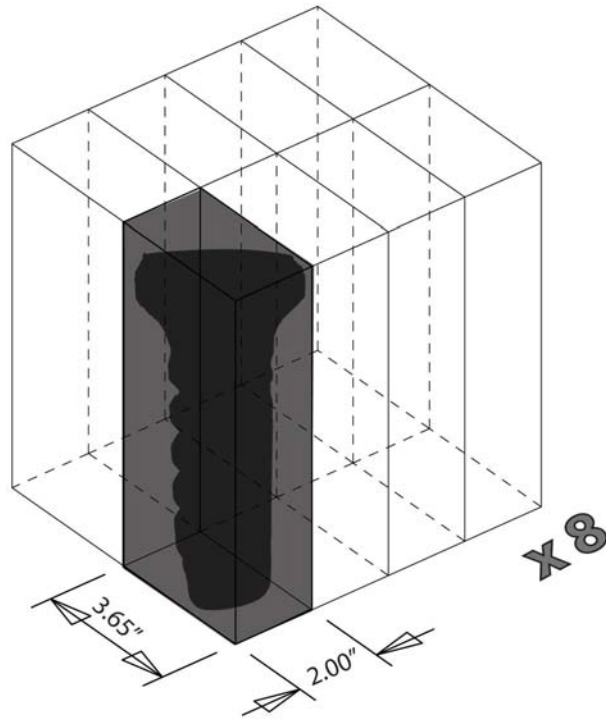

HOW IT STACKS UP

About 50 LuminAID solar lights can be packed and shipped for every 8 mini solar flashlights

VS

The LuminAID solar light is a highly portable form of light.
